

November 2005's monthly index of economic activity, Imacec

According to preliminary information, last November the Imacec increased by 6.1% over the same month a year before. The seasonally-adjusted series rose by 0.3% with respect to the previous month, while the cyclical trend series recorded an annualized increase of 5.4%. The month's result reflected a positive calendar effect due to the meeting of APEC leaders that took place in Santiago in November 2004.
