

PRESS RELEASE

Thursday, 5 January 2012

November 2011's monthly index of economic activity, IMACEC.

According to preliminary information, last November the IMACEC increased 4.0% over the same month a year before. The seasonally-adjusted series rose 0.8% with respect to the previous month, while the cyclical trend series recorded an annualized expansion of 3.8%. The month came with the same number of business days as November 2010.

The result of the month reflected, primarily, growth in trading activity, the dynamism of communications and the drop in mining output.
