July 2014's monthly index of economic activity, Imacec

According to preliminary information, in July 2014 the IMACEC rose 0.9% over the same month a year before.

The seasonally-adjusted series increased by 0.5% with respect to the preceding month, and by 0.9% in twelve months. The month came with the same number of working days as July 2013.

The result was affected by decreases in manufacturing industry, wholesale trade and automobile sales. In contrast, the increased value added by services and mining activity had a positive incidence.
