October 2014's monthly index of economic activity, IMACEC

According to preliminary information, last October the IMACEC rose 1.5% over the same month a year before. The seasonally-adjusted series increased 0.4% with respect to the previous month, and 1.4% in twelve months. The month came with the same number of working days as October 2013.

The result reflected the higher value added from services, which was partly offset by the drop in mining and wholesale trade activity.
