

Santiago, 6 June 2005

IMACEC INFORMATION

The Central Bank of Chile released the following comment on April 2005's Imacec:

According to preliminary information, in April the Imacec increased by 6.3% over the same month a year before. The seasonally-adjusted series rose 1.2% with respect to the previous month, and the cyclical trend series recorded an annualized increase of 5.6%. This year, April came with as many working days as April of 2004.
