Tuesday, 5 April 2016

### **February 2016's monthly index of economic activity, IMACEC**

According to preliminary information, February's Imacec increased 2,8% compared to the same month a year before. The seasonally-adjusted series rose 0,8% over the previous month and increased 1,9% in twelve months. The month recorded a day more than February 2015 due to the leap year. The result was mainly influenced by the growth in service activities, mining and trade.
