September 2019's monthly index of economic activity, IMACEC

According to preliminary information, last September the Imacec rose 3.0% over the same month the year before. The seasonally-adjusted series dropped 0.6% with respect to the previous month, and rose 2.2% in twelve months. The month came with one working day more than September 2018.

The mining Imacec dropped 1.6%, while the non-mining index rose 3.5%, favored by the performance of services and construction activity. In seasonally-adjusted terms, and with respect to the previous month, the mining and non-mining Imacec dropped by 2.9% and 0.4%, respectively.

As per the calendar of National Accounts figures diffusion, this year's third-quarter preliminary GDP results, together with revision to figures of the first and second quarter, will be published next 18 November..
