

Santiago, 5 August 2005

Press Release

June 2005's index of monthly economic activity, Imacec

According to preliminary information, in June the Imacec increased by 6.4% over the same month a year before. The seasonally-adjusted series rose by 0.2% with respect to the previous month, while the cyclical trend series recorded an annualized increase of 5.0%. The year-on-year comparison reflects the fact that June this year came with one more working day than June 2004.

As usual, the preliminary figures for the second quarter's GDP will be published on August 23rd.
