May 2015's monthly index of economic activity, IMACEC

According to preliminary information, in May the IMACEC grew 0.8% over the same month a year before. The seasonally-adjusted series posted no change from the previous month, and rose 1.3% in twelve months. The month came with one working day less than May 2014.

The result reflected in increased value added in services and the contraction of manufacturing, mining, and wholesale trade activity.
