

PRESS RELEASE

Monday, 7 September 2015.

July 2015's monthly index of economic activity, IMACEC.

According to preliminary information, last July the IMACEC rose 2.5% over the same month a year before. The seasonally-adjusted series increased 0.1% with respect to the previous month and 2.7% in twelve months. The month came with the same number of working days as July 2014.

The result reflected, mainly, greater value added of services and manufacturing, partially offset by the drop in mining activity.
