### **November 2015's monthly index of economic activity, IMACEC**

According to preliminary information, in November 2015 the Imacec rose 1.8% over the same month a year before. The seasonally-adjusted series dropped 0.5% with respect to the previous month, and rose 1.5% in twelve months. The month came with one more working day than November 2014.

The result reflected, mainly, increased value added from services, an effect that was partly offset by a fall in mining activity.
