Monday, 7 January 2019

### **November 2018's monthly index of economic activity, IMACEC**

According to preliminary information, in November 2018 the Imacec rose 3.1% over the same month a year before. The seasonally-adjusted series rose 1.2% with respect to the previous month, and 3.3% in twelve months. The month came with one less working day than November 2017.

The mining Imacec increased 5.5%, while the non-mining index increased 2.7%, favored by the performance of services, an effect that was partly offset by a drop in manufacturing activity. In seasonally-adjusted terms, and with respect to the previous month, the mining Imacec increased 10.4% and the non-mining Imacec increased 0.2%.
