Interest rates by type of debtor (1):

(rates on an annual basis 360 days)	
consumer (\$):	21.6%
commercial (\$):	6.3%
foreign trade (US\$):	3.9%
mortgage (UF):	3.2%

Interest rate and volume of new business of loans and deposits

In January, the interest rate on consumer loans increased to 21.6% (December: 20.6%). This is explain by a higher interest rate of the installments credits of credit cards. Meanwhile, the interest rate of commercial, foreign trade and mortgage loans presented similar values than the month before: 6.3; 3.9; 3.2%, respectively (Figure 1).

[View data and annex](#)

The interest rate of deposits in national currency decreased for all maturities. The interest rate for maturities between 30 and 89 days was 2.8% (December: 2.9%), for maturities between 90 days and one year was 3.2% (December: 3.5%) and for maturities between one and three years was 3.7% (December: 4.0%). As for the volume of new business, it increased in all maturities, with the exception of maturities between 90 days and one year where it presented lower values than the previous month. [View data and annex](#)

Nominal loans by type of debtor

In January, the annual growth rate of the total credit stock was 9.7% (December: 10.1%), explained by a lower growth rate of commercial, consumer and foreign trade loans: 9.6; 8.6 and 14.5% (December: 10.0; 8.8; 17.7%), respectively. Meanwhile, the annual growth rate of mortgage loans presented similar values than the month before: 9.5% (Figure 2). [View data and annex](#)

Nominal monetary aggregates

In January, the annual growth rate of M1 was 9.2% (December: 9.7%), explained by lower impact of current accounts deposits. As for M2, the annual growth rate was 9.4% (December: 10.7%), due to the decrease of M1 and time deposits. Finally, the annual variation of M3 was 12.8% (December: 12.5%) caused by an increase of Central Bank instruments and treasury bonds, which overcomes the lower impact of M2. [View data and annex](#)

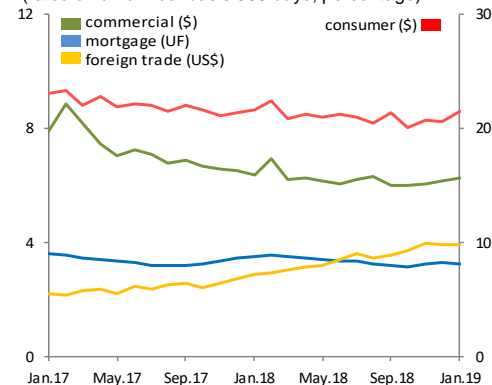

Nominal loans by type of debtor (2):

(annual variation)	
consumer:	8.6%
commercial:	9.6%
foreign trade:	14.5%
mortgage:	9.5%
total:	9.7%

Monetary aggregates (3):

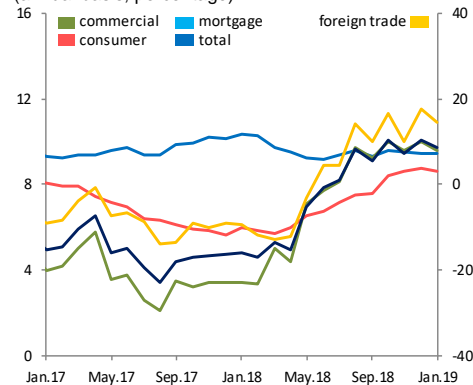

(annual variation)	
M1:	9.2%
M2:	9.4%
M3:	12.8%

Notes:

(1) Interest rates

Weighted average effective interest rates of the operations carried out by commercial banks during a month in the Metropolitan Region.

The interest rates (\$) are expressed on a 360 days basis using the conversion of simple interest. Details regarding shares by maturity and currency of the different types of interest rates are available in: "Serie de indicadores (Excel), hoja resumen". The definition of each product and details regarding their share are available in the following document: "Estadísticas de Tasas de Interés del Sistema Bancario", (E. Arraño, P. Filippi, C. Vásquez, "Serie de Estudios Económicos Estadísticos, N° 113, Banco Central de Chile, julio 2015"). Discontinuous graphs imply that no operations were performed the corresponding month.

(2) Loans

Balance sheets in Chilean Pesos at the end of the last working day of each month. The corresponding information is obtained from the individual balance sheets of each commercial bank. That is, it does not take into consideration the operations of subsidiaries and branches abroad. Preliminary data reported for the last two periods. For more information, see: "Estadísticas de Colocaciones" (E. Arraño and B. Velásquez, "Serie de Estudios Económicos Estadísticos, N° 92, Banco Central de Chile, julio 2012").

(3) Monetary Aggregates

Monthly averages calculated on the basis of information provided by commercial banks, the Superintendency of Banks and Financial Institutions (SBIF), Superintendency of Pensions (SP), Superintendency of Securities and Insurance (SVS) and the General Treasury of the Republic of Chile. Preliminary data reported for the last three periods. For more information, see: "Agregados Monetarios: Nuevas Definiciones", (E. Arraño, "Serie de Estudios Económicos Estadísticos, N°53, Banco Central de Chile, mayo 2006"). As a result of the incorporation of new sources of information, the M2 and M3 series published in October 2017 have been revised since January 2005 to date due to the update of the "Time Deposit (Dp)". In addition, the series of "Deposits in Current Account (D1)" and "Deposits and Savings on Demand (Dv + Ahv)" were reviewed.
