

Monthly Report *February 2017*

Monetary and Financial Statistics

This report presents key monetary and financial statistics with the data up to January 2017. The statistics correspond to information reported by all the banks in the country. Definitions and a greater disaggregation of the series contained in this report are available at the **Statistical Database of the Central Bank of Chile**.

Contact: dineroybanca@bcentral.cl

Interest rates by type of debtor (1):

(rates on an annual basis 360 days)

consumer (\$):	23.0%	↑
commercial (\$):	7.9%	↑
foreign trade (US\$):	2.2%	↓
mortgage (UF):	3.6%	→

Interest rates by type of debtor and maturity

In January, interest rates on consumer and commercial loans increased in comparison with the previous month: 23.0 and 7.9% (December: 22.6; 7.6 and 3.5%), respectively. The interest rate on foreign trade loans decreased: 2.2% (December: 2.3%) and mortgage loans registered levels similar to those in the previous period: 3.6% (Figure 1).

All components of consumer loans registered increased in comparison with the previous month. The increased interest rate on commercial loans is due to the increase in the incidence on overdraft credits. As for foreign trade loans, both the rate on export credits and the rate on import credits declined. [View data and annex](#)

The lending interest rate for maturities between 30 and 89 days and more than three years decreased, and the rates for maturities between 90 days and three years increased.

The interest rates on deposits in Chilean pesos decreased for all the maturities in comparison with the previous month.

The spread of nominal rates decreased for maturities between 30 and 89 days, increased for all other maturities. [View data and annex](#)

Nominal loans by type of debtor

The total credit stock grew annually by 5.2% (December: 5.7%). This is due to the lower growth rates of commercial, foreign trade and mortgage loans: 4.4; -8.2 and 9.2% (December: 4.9; -7.3 and 9.6%). Consumer loans registered a similar growth rate in comparison with the previous month: 8.1% (December: 8.2%) (Figure 2).

[View data and annex](#)

Nominal monetary aggregates

The annual growth rate of M1 stood at 3.1% (December: 4.6%). This is explained by the lower impact of current account deposits. The annual variation of M2 decreased to 5.7% (December: 6.7%), due to lower impact of M1 and time deposits in national currency. As for M3, the annual variation was 7.3% (December: 7.8%), due to lower growth rates of M2 (Figure 3). [View data and annex](#)

Nominal loans by type of debtor (2):

(annual variation)

consumer:	8.1%	→
commercial:	4.4%	↓
foreign trade:	-8.2%	↓
mortgage:	9.2%	↓
total:	5.2%	↓

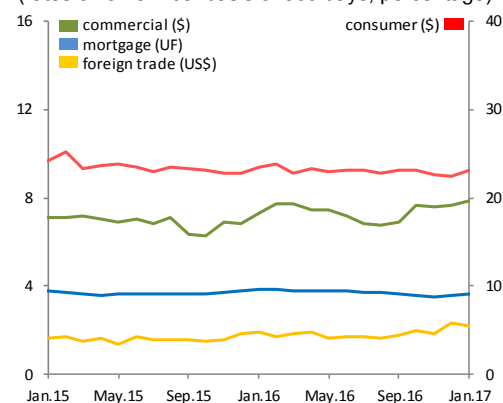

Monetary aggregates (3):

(annual variation)

M1:	3.1%	↓
M2:	5.7%	↓
M3:	7.3%	↓

Note: Icons show the comparison with the annual variation of the previous month.

Notes:

1) Interest rates

Weighted average effective interest rates of the operations carried out by commercial banks during a month in the Metropolitan Region.

The interest rates (\$) are expressed on a 360 days basis using the conversion of simple interest. Details regarding shares by maturity and currency of the different types of interest rates are available in: "[Series de indicadores \(Excel\), hoja resumen](#)". The definition of each product and details regarding their share are available in the following document: "[Estadísticas de Tasas de Interés del Sistema Bancario](#)", (E. Arraño, P. Filippi, C. Vásquez, "Serie de Estudios Económicos Estadísticos, N° 113, Banco Central de Chile, julio 2015"). Discontinuous graphs imply that no operations were performed the corresponding month.

2) Loans

Balance sheets in Chilean Pesos at the end of the last working day of each month. The corresponding information is obtained from the individual balance sheets of each commercial bank. That is, it does not take into consideration the operations of subsidiaries and branches abroad. Preliminary data reported for the last two periods. For more information, see: "[Estadísticas de Colocaciones](#)" (E. Arraño and B. Velásquez, "Serie de Estudios Económicos Estadísticos, N° 92, Banco Central de Chile, julio 2012").

3) Monetary aggregates

Monthly averages calculated on the basis of information provided by commercial banks, the Superintendency of Banks and Financial Institutions (SBIF), Superintendency of Pensions (SP), Superintendency of Securities and Insurance (SVS) and the General Treasury of the Republic of Chile. Preliminary data reported for the last three periods. For more information, see: "[Agregados Monetarios: Nuevas Definiciones](#)", (E. Arraño, "Serie de Estudios Económicos Estadísticos, N°53, Banco Central de Chile, mayo 2006").

This document has been prepared by the Statistics Division of the Central Bank of Chile.
